

Cal-Blue®

GAS LEAK DETECTOR

NEW

From the Leader in Gas Leak Detector Technology!

- Optimum viscosity formulation to enhance contact time... long-lasting bubbles
- Non-corrosive
- Will not affect Ultraviolet (black) lights
- Oxygen-safe
- Non-Toxic

Cal-Blue was developed with today's technician in mind. The advanced formula ensures long lasting bubbles, and the product will remain in contact with the applied surface for an extended period of time. It is also non-corrosive to metal, and this is a significant feature as it helps to maintain the integrity of piping, tubing and fittings. Cal-Blue does not effect Ultraviolet or "black lights" so use freely on systems with fluorescent dyes as they will not interfere with the subsequent use of ultraviolet light detection.
