## Alka-Brite® Plus

TAKING COIL CLEANING TO THE NEXT LEVEL

- New Generation “Brown” Coil Cleaner
- Incredible Foaming Action... See the dirt and grime being foamed out of the coil
- Unsurpassed Cleaning Ability

Alka-Brite was the first non-acid, alkaline foaming coil cleaner introduced to the industry in the early 1980s and now it is being reintroduced as Alka-Brite Plus. It's the newest alkaline coil cleaner with many “Plus” benefits. Foremost is the product's incredible foaming performance. It foams the dirt and grime right out of the coil... you can actually see the efficiency-robbing deposits being pushed out of the coil. It will both clean and brighten the coil, thus restoring design heat transfer
