

LIQUEFY GREASE, OIL, DIRT AND SOIL DEPOSITS ON CONDENSERS

- No rinse required... high solvency cleaning power that evaporates completely
- High-pressure blast cuts through tough grease and grime
- Formulated for condenser coils indoor and outdoor
- Quick drying – leaves no residue
- Pleasant citrus scent
- Works great on all soils
- Compliant with EPA solvent regulations
- 50 state compliant

Description

Nu-Blast is a high performance, no-rinse condenser coil cleaner formulated to meet updated EPA requirements for solvent based aerosols. The product delivers trusted cleaning performance, combining a powerful blasting spray with high solvency to restore coil efficiency quickly and effectively.

The non-flammable, non-conductive formula evaporates completely, leaving no residue behind. Nu-Blast is ideal in applications where a water source for rinsing is limited. It is designed to dissolve grease, oil, dirt, and other stubborn deposits commonly found on condenser coils.

Application

Nu-Blast provides maximum cleaning performance for condenser coils in a wide range of environments. The high-solvency formula and blasting nozzle work together to separate and flush away undesirable materials from coil surfaces.

Use only with adequate ventilation.

Aerosol Products

Nu-Blast®

Directions for Use

1. Spray in well ventilated area as this product has a fragrance that will be objectionable to some people.
2. Be certain there is nothing behind coil that could be hit by spray. Place cloth or other protection under coil.
3. Spray entire coil surface, allowing blast pressure as well as cleaner to work. Thoroughly wet entire surface.
4. Allow the product to flush soils from the coil onto the cloth. Once the coil surface is dry by evaporation, cloth can be removed.

Packaging

18 ounce can **4290-76**

Read and understand the product's label and Safety Data Sheet ("SDS") for precautionary and first aid information.

The SDS is available on the Nu-Calgon website at www.nucalgon.com.
