ClenAir  
Nu-Calgon

Net Wt. 4.25 lbs.

Use in A/C Units, Furnaces,  
Rooftop Units and Air Handlers.

Award Winning Product

To Activate  
Vents:

Use utility  
knife to cut  
away inside  
plastic here  
and on  
other side.

Eliminates odors caused by mold, mildew, bacteria, pets, cigarette and cigar smoke, water damage, fire damage, paints, formaldehyde, hydrogen sulfide and other chemicals, animal decay, stale air, garbage areas, sewer gases, even skunks!

To Activate  
Vents:

Use utility  
knife to cut  
away inside  
plastic here  
and on  
other side.

The unique ClenAir odor neutralizer gel formula has been successfully used to safely eliminate odors in homes, offices, schools, HVAC Systems, restaurants, hospitals, labs, hotels, basements, vehicles, boats, and many other applications for more than 20 years. The HVAC Odor Block is not a perfume mask or cover-up. It is a true odor neutralizer that molecularly reacts with the odor causing compounds and eliminates them and other indoor pollutants leaving a clean, fresh scent behind.

The HVAC Odor Block makes it easy to improve the indoor air quality in the entire home or building by treating the air through the HVAC system.

**Directions:** One HVAC Odor Block XL will treat up to 2500 square feet for 6 months. For larger homes or buildings use multiple odor blocks or the Commercial Odor Block.

To activate the HVAC Odor Block XL, use a utility knife to cut away the inner plastic inside the two oval vents on each side. Cutting this plastic away allows the odor block to evaporate into the airstream to remove odors.

Once activated, place the Odor Block package in the blower compartment of the air handler or furnace or at any other accessible area in the return ductwork. As long as it is in the return air duct or blower compartment, it will treat the home whenever the system fan is on. The HVAC Odor Block XL will last up to 6 months.

For faster treatment or severe odors, open the box top and remove the entire block in plastic from the box. Remove the plastic and place the bare block back into the box and close the top. Place the Package in the return duct or blower compartment. This method will provide more treatment but for a shorter period of time.

**CAUTION: Keep away from children.** May be harmful if swallowed. Store in a cool place. Contents may liquefy at temperatures above 125 F and will resolidify at cooler temps without impairing efficiency of product. Do not store in extreme cold.

ClenAir is Safe!  
Non-Toxic & Environmentally Friendly

Made in U.S.A.

Easy to Use...

1. To activate, use utility knife to cut away inside plastic from oval vents on each side.
2. Place the odor block package in the blower compartment or anywhere there is access to the return duct work.
3. Replace after 6 months.

Shown here is a typical Odor-Block placement in an HVAC system.
