Cal-Blue[®] Plus is the complete gas leak detector for today's service technician. The product, formulated to maintain **long lasting bubbles**, finds the smallest leaks in the system since it clings to surfaces for superior contact time. It is ideal for use in and around **food processing areas**; remove or cover all food products during use. Use freely on systems with fluorescent dyes as Cal-Blue Plus will not interfere with the use of ultraviolet or blacklight detection. Suitable for use on any pressurized refrigerant system, natural gas or oxygen line. Cal-Blue Plus is oxygen safe. **Freeze protected down to 5°F (and will handle up to 225°F).**

DIRECTIONS FOR USE:

This product must be used in accordance to the following directions by HVACR professionals only.

Apply a uniform coating liberally on the surfaces wherever leaks are suspected. Visually examine surfaces for signs of foam or small bubble formation. Be patient - wait a minimum of 5 minutes. Check bottom of all fittings for increased bubbles/foam. If a leak is found, consider Nu-Calgon's EasySeal if the situation is appropriate.
