out clogged tees.**

INFLATABLE DRAIN OPENER

Gallo Gun Cannon

The Gallo Gun Cannon is an inflatable drain opening accessory specifically engineered to quickly and easily clear clogged $\frac{3}{4}$ " PVC condensate drain lines through the existing $\frac{3}{4}$ " tee. Simply drop the Cannon into the cleanout/vent tee on your drain line, push the trigger, and the Cannon will inflate creating an air tight seal while instantly clearing the clog in your drain line. Designed to be used exclusively with the Gallo Gun 4179-01, the Cannon works with vent opening, access fittings, or tees installed on the HVAC drain line and ensures your clogged drain line gets cleaned the right way every time!

INSTRUCTIONS FOR USE: This product must be used in accordance to the following directions by HVACR professionals only. Wear proper safety glasses and gloves.

1. Thread the Gallo Gun Cannon hose onto your Gallo Gun 4179-01.
2. Load a new Mag 20 (4179-20) or Mag 16 (4179-16) in your Gallo Gun.
3. Insert the Gallo Gun Cannon into the tee or access opening on your drain line. Ensure that the Cannon is past the connection that leads into the evaporator.
4. Once the Cannon is in the drain line past the connection to the evaporator coil simply press the trigger of the Gallo Gun. The Cannon will instantly inflate to create an air tight seal in the drain line and the force of the CO₂ will clear the clogged drain line.
